

Medical Equipment for Quarter 2 Students

As part of the quarter 2 books and supplies for your program, you are required to order medical equipment and an appropriate bag for the equipment. You will need many of these tools in the early weeks of quarter 2.

If you require an adaptive version of any of the listed equipment to support accessibility (e.g., an amplified stethoscope instead of an acoustic stethoscope), you may purchase the alternate equipment instead. Students with disabilities may contact studentsuccess@uws.edu to discuss academic accommodations and accessibility at UWS at any time.
